The 'Woke' Are America's 'Useful Idiots'

The infestation of wokeness and idiocy seems concentrated in the very places where progressive socialist policies have failed in America.

Under socialism & communism, there are haves and have nots, there is no equality, nor "equity." If you don't work, you don't eat, and you have to work where you are told. You will get a miserly and spartan apartment with no furnishings. Food will be basic and hard to find. Savings and loans will not exist, healthcare will be sparse and inadequate, basic necessities missing in the stores. Electricity, heat, and water will be rationed along with food. A centralized and controlled economy under communism will not yield any prosperity for the masses, only for the people at the top who control it all. Communist propaganda portrays communism as "the champion of social protest, the only force striving to improve the conditions of the oppressed." This is a total lie. There is no place to redress injustice under communism because the entire system is rigged by and sustained for the success of the elites at the top

of the Communist Party. Communist propaganda promises the simplicity of one party that runs everything and delivers paradise. The propaganda highlights the success of the former Soviet Union, economically, industrially, scientifically, educationally, and technologically, but hide the huge human cost to achieve this communist political order – all the human suffering, gulags, and deaths at the hands of the Communist Party, the only political entity allowed to exist.   Highly insecure and inadequate Americans in their personal lives are attracted to communism because they don't have to be burdened by any responsibility for their bad decisions and terrible actions. They are happy to let communist party leaders make decisions for all individuals. Some even give up their prior religious beliefs and take up atheism as a poor replacement. The party offers endless activities of propaganda, pulling them more and more into the communist movement and forcing them to abandon any outside interests. The party becomes their whole lives. Educating and guiding the masses into submission becomes an all-consuming activity for "selfless dedication and self-sacrifice." The communist propaganda is so strong that citizens continue to vote their way into communist-delivered poverty, crime, and misery. The "woke" Americans in this country are the dedicated fools who believe that socialism and communism are the ways to secure their futures. They may understand that socialism is communism light, or may not understand at all what they are asking for. The "woke" want to live like the "socialist" Nordic countries that seem to be paradise transported on bicycles. What they don't understand is that those Nordic countries are not socialist, they are small capitalist nations with free enterprise, and a government that strongly favors national welfare for its citizens and taxes them to death to pay for these welfare programs.
